

**Division Construction**  
Fasteners and cladding support systems  
for the building envelope

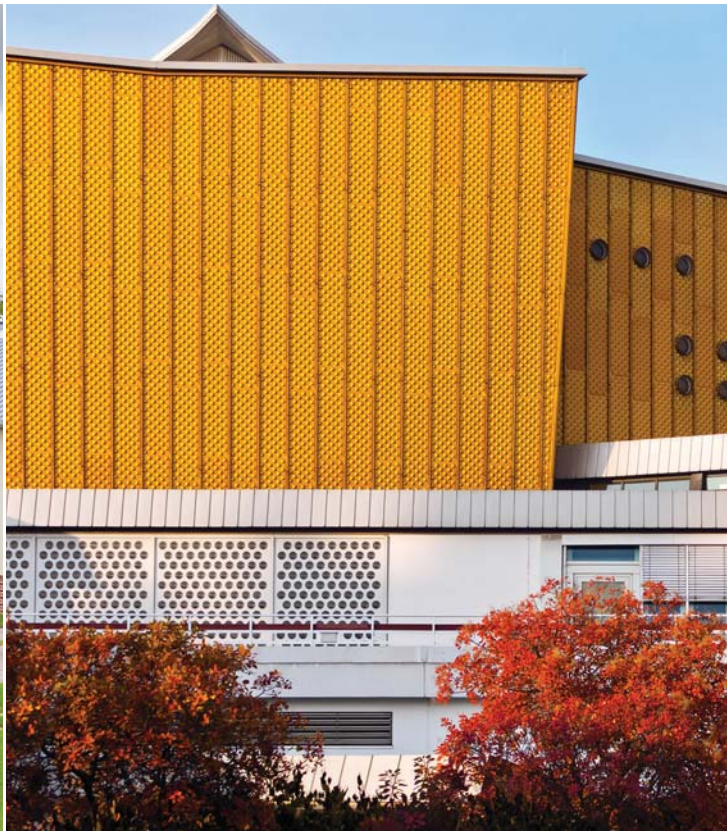

## Division Construction

SFS intec serves the construction industry and suppliers with mechanical fastening solutions for roofing and cladding, metal building, commercial construction and flat roof (low slope) applications. Nvelope rainscreen support systems offer cladding support systems that are economic, safe and effective.

But we're not just a fastener company. We have designed and developed innovative installation tools that increase productivity and make installation more accurate and easier.

SFS intec is a global manufacturer and supplier with headquarters in Heerbrugg, Switzerland. North America headquarters are in Wyomissing, PA with manufacturing and service locations in CA, GA, IA and Canada. While we benefit from the design and production capability of SFS globally, we also maintain local production and product development capabilities in North America. As a result, you benefit from an international network with local knowledge. This allows us maximum flexibility and reaction time, so we can respond to local market changes as they occur.

At SFS intec, our supply chain strategy keeps the fastener production, coating and packaging of our products in our hands. We believe this gives you greater assurance that we will live up to our quality, delivery and service commitments. We maintain the control necessary to meet all your service and delivery requirements.

### Post-Frame Solutions

As a premier manufacturer of fasteners to the post frame building industry, we continue to develop fasteners that meet many requirements and demands by offering metal to wood fasteners with a variety of materials, thread styles and point geometries.

Fastener choices include:

- #9, #10, #12 and #14 wood screws
- Aluminum panel fasteners
- Long-life capped fasteners
- Long-life 300 series stainless fasteners
- Broad selection of blind rivets for secure attachment of light gauge applications
- SSR panel clips and fasteners

Enhanced by a broad offering of accessories, such as foam closures, ridge ventilation, sealants and tapes and pipe flashing makes SFS intec a one-source supplier for metal panel attachment solutions.

### Commercial metal building industry

With a wide range of high performance fasteners, SFS intec is the supplier of choice for the industrial light-weight and commercial metal to metal building industry.

Self-drill screws are offered in a variety of head styles, washer options, drill points and lengths. Materials include carbon steel, bi-metal and stainless steel.

Self-tapping fasteners are available in type A, AB and B in both carbon and stainless steel.

SFS is one convenient source of supply for standard or customer-specific standing seam panel fastening requirements. Clips are available in a wide variety of materials and gauges for snap lock, mechanical seam and architectural panels.

Accessories include closure and venting products, pipe flashing and sealant tapes, blind rivets and grommets.

## Façade / Rainscreen Fastening Solutions

A wide range of fasteners for secure installation of building façades. All fasteners are designed to meet the aesthetic, strength and sustainability demands of today's commercial construction buildings.

Fasteners designed specifically for:

- HPL and fiber cement panel to aluminum, steel or wood
- Aluminum composite material systems
- Curtain wall systems
- Insulated metal panels to steel or wood
- Subframe installation
- Structural metal to metal
- 316 stainless steel fasteners for high corrosive environments

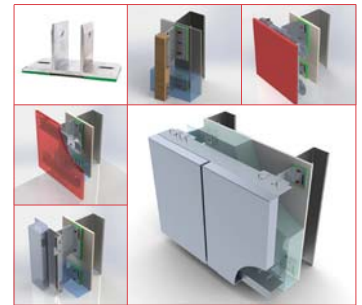

All products can be color matched to the panel.

Easy and accurate installation can be performed with the use of GESIPA® rivet guns and specially designed drill gauges and drive sockets.

## Nvelope Rainscreen Cladding Support Systems

Structurally developed from high specification alloys, Nvelope high-quality cladding subframes are suitable for supporting even the most demanding façade materials

- HPL
- Timber / Weatherboard
- Terracotta/Brickslip
- Fiber cement
- Fiber concrete
- Metals - copper, zinc, steel
- ACM
- and more...

Developed to meet the ever changing face of facade design, the Nvelope system enables the project visions of architects to become a reality. Nvelope bracket and rail systems provide the structural integrity and thermal efficiency required to meet North American building and energy codes while being installer-friendly.

Nvelope rainscreen cladding systems are flexible and economical solutions for new build or renovation projects over steel, concrete, timber or SIPS substructure of any height. Advanced vertical and horizontal support systems can be attached utilizing either mechanical or structural adhesive technique.

## Productivity Solutions

SFS intec offers stand-up roofing tools to increase productivity and provide ergonomic benefits to roofing contractors.

*isofast*® System for insulation and membrane attachment – a one-step process for plate and fastener installation is 3 times faster reducing labor costs and time on job.

*isoweld*® Induction welding system - an innovative induction welding system which welds adhesive coated plates to single ply membranes.

Having used SFS intec tools, contractors have reported significant rooftop productivity gains for insulation and membrane attachment.

*isofast*® and *isoweld*® are unmatched in the industry and provide contractors with the edge required to get on and off of the roof more quickly.

## Low Slope Solutions

Our Dekfast brand of fastening solutions for flat roof applications are designed, manufactured and tested to achieve compliance with Factory Mutual (FM) 4470. Having a wide variety of materials, thread styles, point geometries, finishes and installation applications, Dekfast is a preferred choice for insulation and membrane attachment in wood, steel and concrete decks. The broad range of products include #12, #14 and #15 fasteners, purlin fasteners, insulation panel fasteners, stress plates, augers, fasteners for wall terminations, and solutions for problematic roof decks.

## A global network – A local focus

The SFS intec is a global market leader for mechanical fastening systems. The focus on the needs of our customers has shaped our culture. Our tailored solutions contribute to customers' competitiveness and generate added value.

Headquartered in Heerbrugg (Switzerland), SFS draws from the expertise and know-how from more than 70 sales offices and manufacturing sites in Europe, North America and Asia. Our global team of experts is continuously working on new challenges to stay one step ahead in today's competitive market environment.

At SFS intec, we seek to exceed market expectations with solutions that embrace and advance the latest technology, and together, with our customers, offer a competitive advantage that adds value to a building.

## Industry Involvement

We are proud to support the construction industry with active company and individual participation in the following industry trade associations in North America:

- National Frame Building Association (NFBA)
- Metal Building Manufacturer Association (MBMA)
- Roof Consultants Institute (RCI)\*
- Single Ply Roofing Institute (SPRI)
- Metal Construction Association (MCA)
- National Roofing Contractors Association (NRCA)
- Metal Building Contractors and Erectors Association (MBCEA)
- Roofing Industry Committee on Weather Issues (RICOWI)\*
- The Specialty Tools & Fasteners Distributors Association
- Global Cold Chain Alliance (GCCA)
- Western States Roofing Contractors Association (WSRCA)
