Subject: LEED Statement on SFS intec Butyl Tape

Dear Valued Customer:

Thank you for your continued business with SFS intec. We understand the need to be able to apply for LEED credits in today's construction industry, and further recognize the need for ourselves to collectively act in environmentally responsible manners in order to preserve our future. Unfortunately, at the current time, SFS intec Butyl Tape does not qualify for any LEED credits in terms of recycled content or regionally extracted materials.

Should you require additional information regarding SFS intec Butyl Tape or LEED credits, please contact your local SFS intec Service Representative.
